All Skellerup ‘M’ liners are multi-fit and designed for most milking claws.

IMPORTANT – If the current liner being used is not performing satisfactorily or does not appear in this list please contact Skellerup. For dairy plants using short-shells (140mm) use Reflex M22 (tension ring 2) or convert to standard shells. For Skellerup liner codes refer page 6. Vacuum Shut-off liners may be appropriate. Consult Skellerup if unsure. In the interests of product development Skellerup reserves the right to alter product specifications and features without notice.
