Why Skellerup?

- We are technical experts with a national team of specialists dedicated to educating and supporting both our retailers and farmers to make informed dairy rubberware decisions.
- We are outcome and value focused, partnering with Kiwi farmers to bring together expert advice and proven rubberware performance to increase milking efficiency and profitability.
- We are leaders in our industry, globally recognised for our high-quality dairy rubberware proudly designed and manufactured in New Zealand.
- We have an extensive range of tried and tested products, including milking liners, tubing, milk filters, accessories, animal health solutions and washdown equipment.
- We are innovators backed by over 85 years of research and development, committed to continuous improvement. Driven to deliver rubberware solutions that farmers can rely on for milking performance and cow comfort.

Manufactured in New Zealand and designed for local conditions, Skellerup products consistently deliver the performance and durability dairy farmers rely on.

MILKING LINERS

Skellerup milking liners are designed to fit the diverse range of milking equipment found on New Zealand dairy farms. Serving as the primary interface between the milking system and cow teats, choosing the correct liner is vital for milking performance and animal health.

Skellerup liners offer a range of performance features, including three mouthpiece sizes suitable for various herd types, round or square barrels, various tailpiece sizes to fit different milk claws, and a vacuum shut-off option.

TUBING

Skellerup offers a comprehensive range of rubber, silicone and PVC tubing options tailored to suit New Zealand dairy sheds. Our selection spans from milk tubing, single or twin air tubing, and claw/pulse tubing, providing a complete solution to fully equip an entire dairy shed.

ACCESSORIES

With an extensive range of dairy accessories, including bowls, jetter cups, pump diaphragms, long tail bends and more, Skellerup provides all the necessary equipment for the dairy shed. We also supply washdown equipment, including nozzles, tailpieces, and hoses, to facilitate efficient shed cleaning.

MILK FILTERS

For single use in the dairy shed to safeguard milk quality, Skellerup milk filters are available in various sizes with options for sleeve (open-ended) or sock (one end sealed). All Skellerup milk filters comply with regulations set by the Ministry for Primary Industries (MPI) and ensure a high level of filtration and milk flow.

CALF FEEDING

For optimal feeding performance this calving season, Skellerup teats are the ideal choice, compatible with selected calf feeders in New Zealand.

AMBIC

The Ambic product range specialises in enhancing cow health and improving milk quality with the Jetstream teat spray system and mastitis detectors, offering effective solutions for maintaining herd health.

Request a dairy shed rubberware review

We recommend scheduling a **FREE** rubberware review on an annual basis. The local Skellerup Technical Specialist will visit the dairy shed to troubleshoot, document, and review dairy rubberware. During the review, the Technical Specialist will:

Isolate and troubleshoot issues in the dairy shed

Provide rubberware recommendations to suit the milking equipment and herd

Give expert advice to optimise milking efficiency, milk quality, and cow health

Issue a rubberware maintenance plan
