

Milk Filters

Skellerup milk filters are proudly manufactured in New Zealand to safeguard milk quality. Designed for single use in the dairy shed, our filters are available in various sizes with the option of sleeve (open-ended) or sock (one end sealed). Skellerup milk filters ensure reliable and consistent milk filtration.

Milk Filter Sleeves

All Skellerup milk filters are designed for single use in the dairy shed, with each filter pack containing 100 units. Filter sizes are measured flat in the collapsed position; for example, 75mm diameter filter cage accommodates a 100mm wide filter.

Product code	Product	Product specifications
RMF250	Reflex milk filter sleeves	100mm x 430mm
RMF215	Reflex milk filter sleeves (B)	100mm x 610mm
